

SPECIFICATIONS FOR A 1KG 9999 GOLD BAR

Endorsed by the LBMA & SGE

Weight: 1000g minimum

Dimensions: The kilobar should be rectangular.

The dimensions should fall within the following ranges:

Length: 80 – 120mm

Width: 40 – 60mm

Height: 7 – 14mm

Fineness: The minimum acceptable fineness is 999.9 parts per thousand fine gold.

Marks: Refiner's Stamp or Logo, Serial Number, Weight (1kg or 1000g), Fineness (to four significant figures)

Certificate of Analysis (COA):

A certificate of Analysis must accompany each kilobar on dispatch from the Refiner and must include the following information: Refiner's Stamp or Logo, Serial Number, Weight (1kg or 1000g), Fineness (to four significant figures) and Approved Signature.

Notes: Serial numbers must be unique and non-reusable.

Serial numbers must be referenced against inventory lists to provide traceability.

Specifications are for cast bars.

Comments welcomed by other 9999 kilobar markets.
