

Henan Zhongyuan Gold Smelter Co., LTD

LBMA Responsible Gold Guidance Compliance

Independent Limited Assurance Report

The year ended 31 December 2017

Independent limited assurance statement by Deloitte Touche Tohmatsu Certified Public Accountants LLP to the directors of Henan Zhongyuan Gold Smelter Co., LTD on its Compliance Report for the London Bullion Market Association's Responsible Gold Guidance for the year ended 31 December 2017

We were engaged by Henan Zhongyuan Gold Smelter Co., LTD (Zhongyuan Smelter) to provide limited assurance on its Compliance Report for the London Bullion Market Association's Responsible Gold Guidance (the Responsible Gold Guidance) for the year ended 31 December 2017 (the Compliance Report).

Our engagement was performed with the objective of providing a conclusion on whether the assertions made by management, in their Compliance Report for the year ended 31 December 2017, with respect to the activities undertaken to demonstrate compliance with the Responsible Gold Guidance, are fairly presented.

The Responsible Gold Guidance comprises the criteria by which Zhongyuan Smelter has measured and reported their level of compliance to the Responsible Gold Guidance and this was used for the purposes of evaluating management's assertions.

Responsibilities

The directors of Zhongyuan Smelter are responsible for the preparation and presentation of the Compliance Report for the year ended 31 December 2017 in accordance with the Responsible Gold Guidance. This responsibility includes establishing appropriate risk management and internal controls from which the reported information is derived and for such internal control as the directors determine is necessary to enable the preparation of the Report that is free from material misstatement, whether due to fraud or error.

Our responsibility is to carry out a limited assurance engagement in order to express a conclusion based on the work performed. We conducted our assurance engagement in accordance with International Standard on Assurance Engagements ISAE 3000 Assurance Engagements other than Audits or Reviews of Historical Financial Information issued by the International Auditing and Assurance Standards Board and the guidance set out in the LBMA Responsible Gold Programme - Third Party Audit Guidance for ISAE 3000 Auditors (the Audit Guidance).

The extent of evidence-gathering procedures performed in a limited assurance engagement is less than that for a reasonable assurance engagement, and therefore a lower level of assurance is provided.

Limited assurance procedures performed

We planned and performed our work to obtain all the evidence, information and explanations considered necessary in relation to the above scope. These procedures included:

- Enquiries of management to gain an understanding of Zhongyuan Smelter's processes and risk management protocols in place
- Enquiries of relevant staff responsible for the preparation of the Report
- Site visits to Zhongyuan Smelter

- Assessing the suitability of the policies, procedures and internal controls that the Zhongyuan Smelter has in place to conform to the Responsible Gold Guidance
- Review of a selection of the supporting documentation, including gold supplier counterparty due diligence file and transaction's documentation
- Testing a selection of the underlying processes and controls that support the information in the Report
- Review of the presentation of the Report to ensure consistency with our findings

Inherent limitations

Non-financial information, such as that included in the Zhongyuan Smelter's Compliance Report, is subject to more inherent limitations than financial information, given the more qualitative characteristics of the subject matter and the methods used for determining such information. The absence of a significant body of established practice on which to draw allows for the selection of different but acceptable measurement techniques that can result in materially different measurements and can impact comparability. The methods used by refiners to comply with the Responsible Gold Guidance may differ. It is important to read Zhongyuan Smelter's gold supply chain policy which can be accessed from the contact of Zhongyuan Smelter.

Independence and competency statement

In conducting our engagement, we have complied with the applicable requirements of the Code of Ethics for Professional Accountants issued by the International Ethics Standards Board for Accountants.

In conducting our engagement, we confirm that we satisfy the criteria for assurance providers as set out in the Audit Guidance to carry out the assurance engagement.

Conclusion

Based on the limited assurance procedures performed, as described above, nothing has come to our attention that would lead us to believe that Zhongyuan Smelter's Compliance Report for the year ended 31 December 2017, did not in all material respects, describe fairly the activities undertaken during the year to demonstrate compliance, and management's overall conclusion contained therein, is not in accordance with the requirements of the Responsible Gold Guidance.

Restriction on liability

This report has been prepared for Zhongyuan Smelter for the purpose of assisting the management in determining whether Zhongyuan Smelter has complied with the Responsible Gold Guidance and for no other purpose. Our assurance report is made solely to Zhongyuan Smelter in accordance with the terms of our engagement. We do not accept or assume responsibility to anyone other than Zhongyuan Smelter for our work, or for the conclusions we have reached in the assurance report.

Beijing, the People's Republic of China

Henan Zhongyuan Gold Smelter Co., LTD

Refiner's Compliance Report

<LBMA Responsible Gold Guidance> has been established for Good Delivery Refiners to adopt high standards of due diligence in order to combat systematic or widespread abuses of human rights, to avoid the contribution of conflict and to comply with high standards of anti-money laundering and combating terrorist financing practice.

This report summarized how Henan Zhongyuan Gold Smelter Co., LTD has complied with the requirements of <LBMA Responsible Gold Guidance> for the year ended of Dec 31st, 2017.

Table1: Refiner's details

Refiner's name: Henan Zhongyuan Gold Smelter Co., LTD

Location: China National Highway 209 South, Industry Cluster District, Sanmenxia City, Henan, China

Reporting year-end: 31/12/2017

Date of report: 10/02/2018

Senior management responsible for this report: Peng, Guomin (Board Chairman)

Contact information: Tel: +86-0398-2756698 E-mail: 277407501@qq.com

Refiner's evaluation

Henan Zhongyuan Gold Smelter Co., LTD (Hereinafter referred to as Zhongyuan Smelter) is a well-known enterprise specialized in gold smelting and refining. It is one of the key enterprises of Zhongjin Gold Co., LTD (Hereinafter referred to as Zhongjin Gold) as well as of Sanmenxia, Henan province.

In 2015, Zhongyuan Smelter integrally moved to Industry Cluster District of Sanmenxia City and covers an area of 1,474,764 square metres (1,165,485 square metres enlarged than it was in 2014). The registered capital was increased to 1.5

billion China Yuan (1 billion China Yuan more than it was in 2014). The annual processing amount of ore is 1.18 million tons and the annual production capacities of refined gold, silver, sulfuric acid are 87.32 tons, 218.09 tons, and 977.9 thousand tons respectively.

Zhongyuan Smelter now has 8 production workshops namely the Raw Materials, Smelting, Electrolysis, Slag Beneficiation, Refine, Acid-making, Power and Water Treatment and 25 functional and production-assisted departments. Zhongyuan Smelter's main business comprises gold (including the by-product of silver, cathode copper, copper powder, lead powder, sulfur powder, sulphuric acid) refining and sales; acquisition and storage of raw material and equipment of gold production; the R&D and consulting services of gold production technology; acquisition, production, processing and marketing of non-standard gold, gold and silver and its products, jewelry, crafts (heritage excepted); technology and goods import and export business, etc.

Zhongyuan Smelter obtained the current certificates under the GB/T 19001-2008/ISO 9001:2008 Quality Management Standard, the GB/T 24001-2004/ISO 14001:2004 Environment Management Standard, and the GB/T 28001-2001/OHSAS 18001:2007 Occupational Health and Safety Management Standard in 2014. These three standards cover products and process of gold ingots, silver ingots, sulfuric acid, copper cathode, iron oxide pigments, ammonium sulfate and its by-product of lead. The certificates of GB/T 19001-2008/ISO 9001:2008 Quality Management Standard and GB/T 24001-2004/ISO 14001:2004 Environment Management Standard are valid till Sep 2018. The GB/T 28001-2001/OHSAS 18001:2007 Occupational Health and Safety Management Standard is valid till Mar 2020.

Zhongyuan Smelter is the subsidiary of Zhongjin Gold, an A-share listed company in China. As a part of listed company, Zhongyuan Smelter has to comply with Chinese listed companies internal control regulation <The Basic Standard for Enterprise Internal Control> and Supporting Guidance and complete a self-assessment and report of the internal controls. Controls of procurement are included especially in <The Basic Standard for Enterprise Internal Control> and Supporting Guidance, which

requiring enterprises set up a scientific system of supplier evaluation to formalize qualified supplier list and to evaluate qualified suppliers comprehensively.

Table2: Summary of activities undertaken to demonstrate compliance

Step 1: Establish strong company management systems

Compliance Statement with Requirement:

We have fully complied with Step 1: Establish strong company management systems.

Company Policy: The Company has officially issued <Responsible Gold Supply Chain Due Diligence Management Policy of Henan Zhongyuan Gold Smelter Co., LTD> (Hereinafter referred to as 'Responsible Gold Supply Chain Due Diligence Management Policy'), which is consistent with the model set out in <Annex II of OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas> in 2013. The policy sets out our responsibility for conducting risk-based due diligence, screening and monitoring of transactions and the governance structures in place. Zhongyuan Smelter made organizational structure adjustment in September of 2016. Henan Zhongyuan Gold Smelter Co., LTD (Hereinafter referred to as “Refiner”) adjusted its organization structure in September of 2016, including detaching the Risk Controlling Department from the Marketing Centre and renamed as the Risk Control and Compliance Management Department which takes charge of the compliance management, risk control and legal affairs. Zhongyuan Smelter amended <Responsible Gold Supply Chain Due Diligence Management Policy> and released it on 31st Dec 2016. The revised policy came into effect on Jan 1st, 2017.

Internal Management Structure: An internal management system has been set up to define the governance, roles and responsibilities, communication and senior management review as per the adopted <Responsible Gold Supply Chain Due Diligence Management Policy>. The Senior Management Committee, the governing body of due diligence management, is responsible for reviewing <Responsible Gold Supply Chain Due Diligence Management Policy>, appointing Compliance Officer to manage routine work of due diligence and authorizing the Deputy General Manager

in charge of the Gold-bearing Material Procurement Department to review the due diligence results and risk management strategy. The Compliance Officer is responsible for compiling and updating <Responsible Gold Supply Chain Due Diligence Management Policy>, reviewing the due diligence results submitted by the Gold-bearing Material Procurement Department, evaluating the effectiveness of risk management strategy, coordinating the gold supply chain training and reporting directly to Senior Management Committee when necessary. Gold-bearing Material Procurement Departments are responsible for supplier evaluation prior to contracting, monitoring of transactions with approved suppliers and an annual revaluation process. Human Resource Department and Supervision Department also play important roles in due diligence process.

The Senior Management Committee holds committee meeting at least once a month. In the meeting held on Sep 12th 2016, the members of committee reviewed and approved the revised edition of <Responsible Gold Supply Chain Due Diligence Management Policy>, reviewed the results of responsible gold supply chain due diligence for new suppliers in 2016 and annual supplement due diligence assessment for existing suppliers in 2016 and appointed Hu Yingxia, the Head of Risk Controlling Department of Market Centre as the new Compliance Officer. Hu Yingxia has extensive experience in gold refinery technology and supply chain and risk management. And Responsible Gold Supply Chain Due Diligence Management Policy has not been modified, in 2017.

Internal System: In 2017, Zhongyuan Smelter followed the <Responsible Gold Supply Chain Due Diligence Management Policy> strictly and conducted risk-based due diligence investigation for suppliers. All the transactions were monitored to avoid building relationship with the suppliers associated with high risk. Meanwhile, all due diligence investigation findings and results were reviewed by the Compliance Officer and approved by the deputy General Manager. Given the changes in suppliers and risk management strategy, The Purchase of Raw Material Department I and Purchase of Raw Material Department II have conducted annual supplement due diligence assessment for suppliers. The results were reviewed by the Compliance Officer and the deputy General Manager and approved by the Senior Management Committee.

Engagement with Gold-supplying Counterparty: Staff from the Purchase of Raw Material Department I and Purchase of Raw Material Department II should require all gold-supplying counterparties to sign the declaration before contracting to ensure that they are aware of company's commitment to <LBMA Responsible Gold Guidance>, the supply chain policy and respective requirements. In this declaration, gold-supplying counterparties should commit to, and acknowledge in writing that there is no serious human rights abuse associated with the extraction, transport or trade of minerals, no direct or indirect support to non-state armed groups, no direct or indirect support to public or private security forces and no bribery and fraudulent misrepresentation of the origin of minerals, money laundering. Also, the payment of taxes, fees and royalties related to mineral extraction, trade and export from conflict-affected and high-risk areas are paid to governments. All suppliers contracted in 2017 have signed the declaration.

Communication Mechanism: In order to help all staff involved in the gold supply chain to have a thorough understanding of the due diligence system, the Risk Control and Compliance Department has launched training program on Dec.28 2017. The trainee are mainly employees of the gold-bearing material departments. The purpose of training program was to help them establish a deep-through understanding of the <LBMA Responsible Gold Guidance> and the related toolkit, including the LBMA regulatory requirements, Responsible Gold Supply Chain Due Diligence Management Policy and the risk management of gold procurement process (Risk Pre-Control, Risk Assessment, Monitoring and Communication Mechanisms, etc).

Meanwhile, the revised edition of policy and issuing notice has been uploaded onto the Office Automatic System, through which every staff can gain access to see the policy. All employees can access the <Responsible Gold Supply Chain Due Diligence Management Policy> on the bulletin board near the gate of company. Zhongyuan Smelter also built a company-wide communication mechanism to promote broad employee participation and risk identification to risk management. Employees are welcomed to voice their concerns over the gold supply chain or any newly identified risk via hotline, E-mail or mailboxes.

Step 2: Identify and assess risk in the supply chain

Compliance Statement with Requirement:

We have fully complied with Step 2: Identify and assess risk in the supply chain.

Risk Identification for Gold-bearing Material Supplier: In the <Responsible Gold Supply Chain Due Diligence Management Policy>, Zhongyuan Smelter clarified approach for risk identification in the supply chain and conducted the risk identification based on this approach. Before entering into business relationship, the Purchase of Raw Material Department I and Purchase of Raw Material Department II need to complete <Responsible Gold Supply Chain Due Diligence Form> basing on <LBMA RGG Questionnaire> to collect supplier information including company type, registration location, and transaction type, thus evaluate new suppliers' risk.

For large-scale mined gold suppliers, origin of mined gold and mining licenses should be obtained and import/export licenses should be obtained if applicable; for artisanal and small-scale mining suppliers, mining licenses should be obtained to prove their legalities; for recycled gold and secondary gold suppliers, the policies and practices related to anti-money laundering and combating terrorist financing should be obtained.

The Purchase of Raw Material Department I and Purchase of Raw Material Department II obtained the relevant certifications of mined gold and recycled gold suppliers in 2017. Each supplier's financial policy requires that all the income and expenditure of transaction need supportive documents, thus avoiding the risk of money laundering and financing of terrorism. The company will strengthen the requirements on secondary and recycled gold suppliers' direct policy related to anti-money laundering and combating terrorist financing to manage their own upstream risks in future.

As at 31st Dec 2017, the Purchase of Raw Material Department I and Purchase of Raw Material Department II have completed risk identification of all the existing suppliers.

Risk Assessment for Gold-bearing Material Supplier: In <Responsible Gold Supply Chain Due Diligence Management Policy>, Zhongyuan Smelter defined the method to evaluate high risks and to conduct the annual revaluation.

Before entering into a business relationship, the Purchase of Raw Material Department I and Purchase of Raw Material Department II performed new supplier due diligence with respect to company and country risks. We defined the following six criteria in assessing high-risk. Country risks include:

- (1) The mined gold or recycled gold originates from or has been transported through a conflict-affected or human right abuse area (high risk area or human right abuse area is reference to Heidelberg Barometer);
- (2) The mined gold or recycled gold is claimed to originate from a country that has limited known reserves or stocks, likely resources or expected production levels of gold;
- (3) The mined gold or recycled gold is claimed to originate from a country through which gold from conflict-affected and high-risk areas is known or reasonably suspected to transit.

Company risks include:

- (1) Supplier or its up-stream company is located in a high risk country that is related to money-laundering, criminal or corruption;
- (2) Supplier or its up-stream company or beneficial owners are politically exposed person;
- (3) Supplier or its up-stream company is active in a higher-risk business activity such as arms, gaming and casino industry, antiques and art, diamond merchants, sects and their leaders.

If any of above risk events occurs, Zhongyuan Smelter would define the supplier as high-risk supplier and wouldn't build business relationship with them. If any of those risk events are likely to occur, Zhongyuan Smelter would not enter the business relationship before an authorized investigation. If none of those risk events occur, Zhongyuan Smelter would establish business relationship as a 'normal cooperation' with this supplier.

During the transaction process, the Purchase of Raw Material Department I and Purchase of Raw Material Department II should also monitor and assess the risk. We collected suppliers' information based on transaction type and origin of transaction area. We would suspend the relationship and report to the Compliance Officer if the 'normal cooperation' may be potentially involved in money laundering, financing of

terrorism, conflicted-affected and high-risk areas or violations of human rights. If there is solid evidence to prove that supplier is involved in money laundering, financing of terrorism, conflicted-affected and high-risk areas or violations of human rights, we would abandon the relationship immediately.

As at 31st Dec 2017, Zhongyuan Smelter completed all the risk assessment for new and existing suppliers. All new gold-bearing material suppliers were based in China. Origin of gold concentrates of Individual foreign suppliers, such as MRI TRADING AG (hereinafter referred to as "MRI") and CLIVEDEN TRADING AG (hereinafter referred to as "CLIVEDEN"), are coming from conflict areas such as Peru, Turkey, Tanzania and Papua New Guinea. However, through the inspection of "Heidelberg barometer", mined gold are not located in the conflict areas, and Zhongyuan Smelter has already signed the Letter of Commitment for Supplier Responsible Gold with MRI and CLIVEDEN. In the letter, the two companies committed not to purchase mined gold in conflict areas, and country risks have been assessed as low risk.

Zhongyuan Smelter collected the company nature, registration location and transaction type of suppliers. We also checked whether the recognizable beneficial owners of supplier are on the terrorist organization list published on People's Republic of China Ministry of Public Security's website and whether the recognizable beneficial owners have obtained the antique trading certificates. We have improved our work on the identification of benefit owners of private company. By taking the advantage of National Enterprise Credit Disclosure System platform (<http://www.gsxt.gov.cn>), we were able to check on suppliers' information regarding to shareholders/benefit owners.

Meanwhile, we assessed the commodity risk of our suppliers by reconciling between goods delivery notes and our own assay reports and by checking whether supplies are transported through high risk area. No high or medium risk suppliers were identified in 2017.

Risk Assessment Report for Gold-bearing Material Supplier: The Compliance Officer is responsible for reviewing the authenticity, validity and completeness of due

diligence and then reporting to the two Deputy General Managers in charge of the Purchase of Raw Material Department I and Purchase of Raw Material Department II. The Deputy General Managers in charge of the Purchase of Raw Material Department I and Purchase of Raw Material Department II review and sign off the due diligence report. Any contract with terms longer than one year should be approved by Senior Management Committee. Only in the case that risk management strategy is identified as 'normal', the purchase transaction could be processed.

All <Responsible Gold Supply Chain Due Diligence Form - New Supplier> were reviewed by the Compliance Officer in 2017. In the Senior Management Committee meeting held on 19th Dec 2017, the committee members approved the suppliers' due diligence results.

Step 3: Design and implement a management strategy to respond to identified risks

Compliance Statement with Requirement:

We have fully complied with Step 3: Design and implement a management strategy to respond to identified risks.

Risk Management: Zhongyuan Smelter takes diverse risk management strategies based on different due diligence results. Where the result of the due diligence is not fully satisfactory, but the assessed company in the supply chain is using reasonable and good faith effort, we will continue to refine gold coming from this source provided that it adopts an improvement strategy stating clear performance objectives within a reasonable timeframe. If the result of the gold supply chain due diligence concludes that there may exist money laundering, terrorist financing, contribution to conflict, human rights abuses, or if the possibility of the same is deemed high, we will stop immediately to refine gold from this source until additional information or data confirming or refuting the preliminary assessment.

For 'normal cooperation' that planned risk resolution with specific schedule, the Purchase of Raw Material Department I and Purchase of Raw Material Department II are responsible for overseeing the implementation of risk resolution. Compliance Officer should review the results regularly.

According to the due diligence results for 2017, there was no supplier that need a management strategy of risk mitigation.

Continuous Monitoring: At the end of each year, the Purchase of Raw Material Department I and Purchase of Raw Material Department II are responsible for collecting all changes to suppliers' information, the on-going monitoring results of transactions and conducting the annual supply chain due diligence revaluation to decide whether to continue cooperation.

At the end of 2017, the Purchase of Raw Material Department I and Purchase of Raw Material Department II conducted annual supplement risk assessment for all the supplier other than new suppliers. Compliance Officer has reviewed the assessment result. In the Senior Management Committee meeting held on Dec 19th 2017, the management reviewed and approved the assessment result. There is no supplier whose assessment result is identified as "Suspend Cooperation" or "Terminate Cooperation".

Step 4: Arrange for an independent third-party audit of the supply chain due diligence

Compliance Statement with Requirement:

We have fully complied with Step 4: Arrange for an independent third-party audit of the supply chain due diligence.

Zhongyuan Smelter engaged the services of the assurance provider Deloitte Touche Tohmatsu Certified Public Accountants LLP on 27th Dec 2017. They performed a limited assurance engagement in accordance with International Standard in Assurance Engagements ISAE 3000 Assurance Engagements Other than Audits or Reviews of Historical Financial Information (ISAE 3000). Deloitte's assurance report can be found in attached document.

Step 5: Report on supply chain due diligence

Compliance Statement with Requirement:

We have fully complied with Step 5: Report on supply chain due diligence.

To align to the specific requirements in the <LBMA Responsible Gold Guidance>, Zhongyuan Smelter prepares and reports <The Refiner's Compliance Report> on time.

Other stakeholders could contact us to obtain a copy of <The Refiner's Compliance Report> via telephone and email.

Zhongyuan Smelter's overall conclusion

Table 3: Management conclusion:

Overall speaking, in 2017 Zhongyuan Smelter has improved the RGG supply chain management system, identified and assessed the associated risk for our suppliers, designed and implemented risk management strategy, conducted independent third-party audit for supply chain due diligence investigation. Zhongyuan Smelter has therefore fully complied with <LBMA Responsible Gold Guidance> in the year ended 31st December 2017.

In the next phase of work, given the fact that made organizational structure adjustment after relocation, we will take this opportunity and are committed to continuous improvement and aim to combine the responsible gold supply chain process with our existing supply chain process more effectively. Any corrective action identified will be monitored internally on a regular basis.
